

Serial No.: 09/627,166

Group Art Unit: 1732

Filed: July 27, 2000

Examiner: M. Theisen

For: **METHOD OF AND APPARATUS FOR PRODUCING PELLETS FORM
HEAVY HYDROCARBON LIQUID**

ATTACHMENT B - CLEAN COPY OF AMENDED CLAIMS

Please cancel claims 3, 9, and 11 without prejudice or disclaimer to the subject matter contained therein.

Please amend claims 4, 5, 6, 10, and 12 as follows:

Sub E 4. (Amended) Apparatus according to claim ~~6~~² wherein said transporting means includes a conduit that supplies the slurry to the required location.

5. (Amended) Apparatus according to claim ~~6~~² including a pump for pumping the slurry to said location.

C 6. (Amended) Apparatus for producing asphaltene pellets comprising:

a) flow means that supplies hot asphaltene through a conduit to its outlet;

b) pellet producing means that breaks up the liquid stream of said hot asphaltene exiting the outlet of said conduit and produces pellets of asphaltene;

c) a reservoir or container that collects said pellets of asphaltene together with some fluid producing a slurry;

d) transporting means that transports said slurry to the required location; and

wherein said pellet producing medium is water.

C2 10. (Three-times Amended) A method for producing asphaltene

pellets comprising the steps of:

- 2
- a) supplying hot asphaltene through a conduit to its outlet;
- b) breaking up the liquid stream of said hot asphaltene exiting the outlet of said conduit using a pellet producing medium to produce pellets of asphaltene;
- c) collecting said pellets of asphaltene in a reservoir together with some fluid producing a slurry; and
- d) transporting said slurry to a required location;
- wherein said step of breaking up the liquid stream of hot asphaltene flowing out of the outlet of said conduit using a pellet producing medium so that pellets of asphaltene are produced is carried out by spraying a fluid so that the fluid contacts the asphaltene exiting said outlet of the conduit and pellets of asphaltene are produced.

3

12. (Amended) A method according to claim 10 including pumping the slurry to said location;

and wherein the step of collecting said pellets of asphaltene in a reservoir together with some fluid producing a slurry is carried out by collecting said pellets of asphaltene in a reservoir together with some liquid water producing a heavy hydrocarbon or asphaltene-water slurry;

and wherein the step of transporting said slurry to a required location is carried out by supplying said slurry via a conduit to a required location.
